The International Typographical

Urges the Passage of the Chinese Exclusion Bill
WASHINGTON, Jan. 30.—Messrs. J. C. Kennedy, Dewitt C. Chadwick, and H. S. Rogers, the committee representing the International Typographical Union, appeared before the committee on the Judiciary this morning to urge the passage of the Chinese Exclusion Bill. Mr. Kennedy made an able argument which was listened to with much interest by the members of the committee. He was listened closely by them.

He said that printers favored the cause because they believed that it would stimulate book printing in the United States. The London Times had expressly stated its passage would transfer the publishing interests of the world from England to America. Mr. Kennedy coincided with this view.

One of the committee members expressed that it would throw many printers out of business in publishing houses that reproduce the work of the artist. Mr. Kennedy said that the official Typographical Union No. 6 averred that mine had already petered out. He said that the work of a letter press compositor, such work where formerly hundreds employed. The works are now put up by stereotype establishments, known as "stereotypes," and the work is done by type only once. Then the stereotype are sold to different publishing houses and separate editions of the work are made.

Another member of the committee testified that the passage of the bill would increase the cost of literature to the people. Mr. Kennedy argued that the cost would be so low that the petition would be so great that books would be sold at a low rate as they are today, despite several instances in support of his argument.

At the conclusion of Mr. Kennedy's argument, he was warmly thanked by the members of the committee. One of the members, who has heretofore been on the record as boldly for the bill, all agreed that the bill was a very good one. The committee representing the International Typographical Union than from all other labor organizations, that have a veto right, passed before them.
